Attachments: LCR PE and CN check.xlsx

Importance: High

Luis,

This is what I just sent to the DEs. I added some more to your spreadsheet to aid in the process.

I will be out, but feel free to call my mobile number, and I will be watching emails some.

Darrin

Importance: High

REs and DEs,

As you know USEPA completed a file review of systems regarding compliance with the LCR. As a result of this we are being asked to as quickly as possible check the systems in the attached sheet for whether they exceeded the Action Level in their latest sampling, and if they did was the public education and consumer notifications completed. If the PE and CN were not completed we need them to proceed with that immediately and track its completion. Some of these systems were part of the file review, and some are not but are known to have LCR issues. Please fill in the spreadsheet for your systems and return.

Luis Garcia-Bakarich is coordinating this quick review on the USEPA side and you can contact him directly with questions as well.

We need to complete this task as soon as possible, so please make it your top priority. Please attempt to complete this by 12/29 or let me know if you will be unable to. You may also submit a partially completed spreadsheet for those systems you are able to assess on Friday.

Thanks,
Darrin

Darrin Polhemus, P.E.
